

# People Directory

People Directory provides a clean and rich phone book and directory services to an organization's Intranet portal. With a number of filtering and search options, searching and retrieving user profile information is made so easy and convenient.

## Features

- The Employee Directory uses the SharePoint user profile information as its source and hence will always be synced with your updates, if the profile synchronization service is in place and configured right.
- Intuitive and Rich User experience.
- Employee Search control (app-part) to add on to any page within the host site.
- Alphabetical index available for quick navigation
- Ability to follow a profile or add to favorites.
- Filter the results by skills, locations and departments.
